

APPENDIX A  
PARCEL ID GUIDE

Parcel ID's are each eighteen digits long in three groups of six as shown below:

**XXXXXX-XXXXXX-XXXXXX**

The diagrams below show how parcel ID's are constructed. Parcels are separated into four classes based first on whether the parcel is within a city's limits and second on whether the parcel is within a recorded plat. Digits filled with "X" will be filled in with the appropriate numbers based on the location of the parcel. Designators are shown on the next page
